

ISCOM Paris

INTER1 IT/Graphic Design Skills

Sample final test or exam

Download [iscom.millner.fr/down/sample-inter1-final-exam.zip](https://www.iscom.millner.fr/down/sample-inter1-final-exam.zip)

Un-zip the file (a directory).

Create a new directory SURNAME_Firstname: you will place your results here-in.

1. Photoshop colour change and resize (3/20 marks)

Open the image “man-walking.jpg” in Photoshop.

- Change the colour of the man’s jacket from brown to a pleasant green.
- Crop the image to ratio 5:4.
- Export the image for web (i.e. a JPG of small file size) with width 1250 px.
- Place result in your SURNAME_Firstname directory.

2. Illustrator pen tool etc. (3/20 marks)

Create an A4 landscape file in Illustrator.

- Place the “vase.jpg” image and trace just the vase using the pen tool.
- Make the vase dark blue with no outline.
- Remove (delete) the vase photo.
- Enlarge the blue vase to mostly fill the page.
- Cut out an ellipse (cut out; not white).
- Place a green rectangle behind as shown.
- Save as an Illustrator file and place this file in your SURNAME_Firstname folder.

3. Photoshop for mockup (3/20 marks)

Use the logo “Diogenes-logo.ai” and the mockup file “Cap-Single.psd” to create the below.

Export the result as a JPG for web (i.e. small file size) of width 1000 px, and place just the JPG file in your SURNAME_Firstname directory.

Go to next page (overleaf)...

Aside:

Diogenes is a real company, US based, and active in the financial services/fiduciary market.

Diogenes is also the name of a Greek philosopher who used to carry a lamp even in the daytime, hence the white light shining through the yellow “d” in the logo.

–

4. Indesign business card (8/20 marks)

So let's pretend that Diogenes needs a business card for its European operation.

The business card will be in two colours, for two colour printing:

- yellow is PANTONE uncoated 109 U (“U” means solid uncoated)
- black is PANTONE Black 6 U.

The font is Lato, which you can get from Adobe Creative Cloud or from Google Fonts.

Create the business card as below in Indesign:

- format 50 mm x 89 mm, plus bleed of 2 mm (quite close to an American standard)
- two-colour printing as per yellow and black above
- the light grey background is the PANTONE black with a tint of 15%
- font is Lato Regular and Lato Heavy, 8,5 pt with 11,5 pt inter-linage
- basic text you can copy from “buscard-text.txt”.

Export for print as PDF/X-1a:2001, with crop marks and bleed.

Place the PDF result in your SURNAME_Firstname directory.

5. Illustrator thumbnail image (3/20 marks)

Create (in Illustrator) a thumbnail image with just the yellow “d” of the logo, 400 px x 400 px, and export as a PNG file with white background.

Place the PNG result in your SURNAME_Firstname directory.

Zip your SURNAME_Firstname folder with name “Inter1_SURNAME_Firstname.zip” and upload this to the “Graphic Design Skills test” assignment on the Microsoft Teams platform.
